## EQUIPMENT CONDITION MONITORING SERVICES (PREDICTIVE MAINTENANCE)

OUR SERVICES INCLUDE:

- **LUBE OIL ANALYSIS**

We sell a wide range of equipment used for carrying out oil analysis. We also have certified Tribologists that carry out analysis on the different machine fluids (New oil, used/in-use oil, hydraulics, coolants, grease, QC fuels) in our well equipped laboratory, in order to help you monitor the condition of your equipment.

*COMBINATION KIT - FLUID SCAN Q1000 AND SPECTROVISC Q3000*

**IMPROVE RELIABILITY, AVAILABILITY AND PERFORMANCE**

- **FLUID CONTAMINATION CONTROL, FILTRATION AND STORAGE**

At O-SECUL Nigeria Limited, we sell and install a wide range of equipment/tools for lubricant contamination control, filtration and storage products to help keep your lubricants always clean and hence improve the performance of your industrial equipment.

***DESSICANT BREATHER FOR CONTAMINATION CONTROL***

- **TRANSFORMER OIL ANALYSIS**

We carry out analysis on oils used in transformers. These analyses provide early warnings as to whether or not the oil is capable of fulfilling its role as an insulant. This allows maintenance manager/officer to identify maintenance priorities.

***FOR DISSOLVED GAS-IN-OIL ANALYSIS***

***IMPROVE RELIABILITY, AVAILABILITY AND PERFORMANCE***
